

Competence in Water Issues Good Environmental Practice

20 YEARS: AKUT UMWELTSCHUTZ INGENIEURE

Umweltschutz Ingenieure - Berlin

You are looking for adapted solutions? Cost efficient and sustainable as well?

Wastewater Treatment at its best state-of-the-art
Small to medium size SBR ponds or CWs: We have a simple solution that meets the highest environmental standards.

R+D Projects
We are developing new standards for (combined) sewage treatment with constructed wetlands. We test filtersystems for Phosphorus retention and develop systems for Nitrogen removal from agricultural runoff. We design modular CSO plug and catchment systems for sewer outlets direct within receiving water bodies (i.e. *Spree2011*)

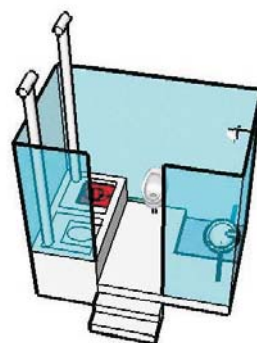

“Nonnenfließ”

Habitat of *Cottus gobio*

Ecological Water Engineering
We develop natural pathways for fish and other water organisms. We improve structures of water bodies and help to store water in landscape.

BES Rotána del Perú

“Lima”

Dry Toilets for all

Baño inteligente

Partner of Rotaria del Perú

Ecological Sanitation (ecosan)
We offer the complete bunch of new sanitation systems incl. water saving, reclamation and reuse, separation technologies and energy conservation.
